

## Navigating My GeorgiaVIEW Interface

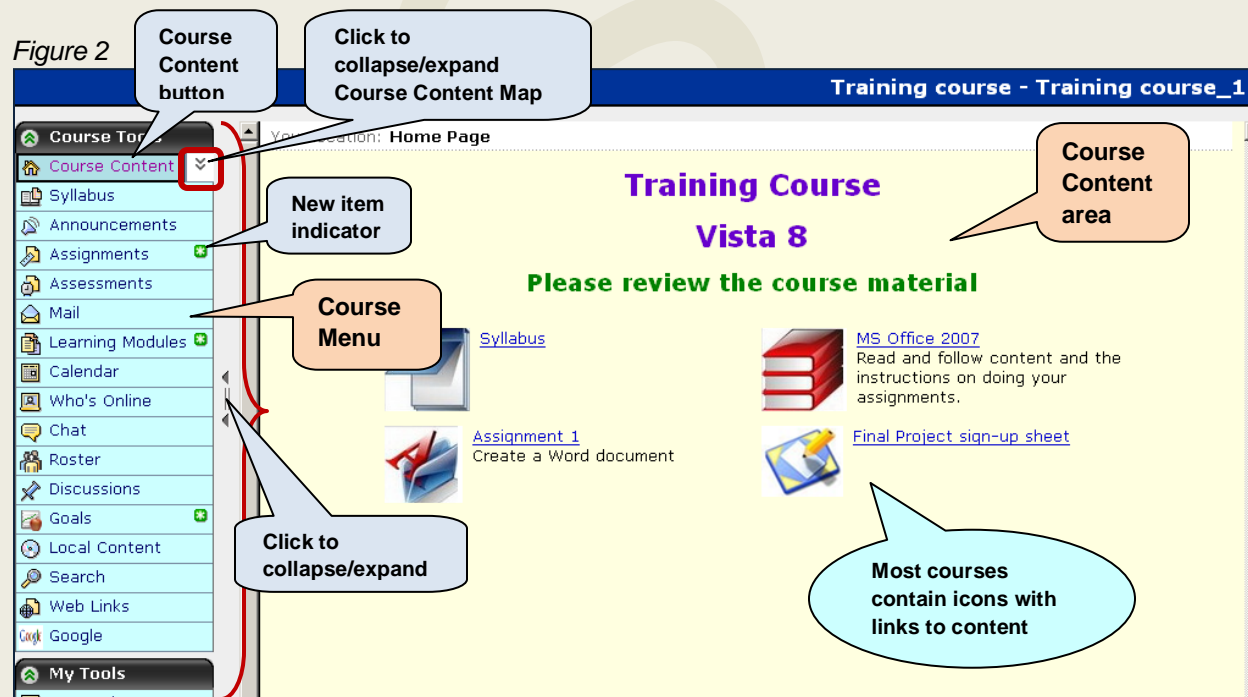

On the **GeorgiaVIEW Welcome screen**, click the course link you want to enter (Figure 1).

Figure 1

The **student GeorgiaVIEW course interface** (Home page) has two main parts: a **Course Menu** and a **Content area** (Figure 2).

1. The **Course Menu** is the primary navigation feature in a course. It is visible throughout the course.  
You can use the course menu to access all tools and content of a course. When you access a tool or content, it appears in the **Content** area in the center of the screen. You view and work with tools and content in this area.

The Course Menu includes two parts:

- **Course Tools** – allows you to access course content and activities.

**Note:** To get back to the Home page, click the Course Content button

- **My Tools** (Figure 3) – contains **My Grades**, **My Progress**, **Notes** and maybe some other tools depending on your instructor's teaching style.

Figure 3

2. You can access content in individual course tools. For example, you can access assignments by clicking the Assignments link in the Course menu or you can click the Assignment icon in the Content area, if the icon is available. When new content is available in each tool, a **New** green indicator  appears next to the tool.
3. Your current location in a course appears in the **breadcrumbs** at the top of the screen (Figure 4). Breadcrumbs also list the path of screens that you have visited. You can click a breadcrumb to return to a previous screen or to navigate through screens.

Figure 4

**Note:** Clicking the **Course Content** button (Figure 4) under **Course Tools** in the left column always brings you to the course **Home page**.

The system is designed to work with the navigation buttons provided on the site. We do not recommend to use the Back and Forward buttons on your browser.

Use the scroll bar to view all of the information on each screen.
